

WHEEL COVER RETENTION CLIP

ABSTRACT OF THE DISCLOSURE

A wheel cover assembly includes a cover member having an inner surface, an outer surface, a body portion, and a skirt portion extending inwardly from and circumferentially about the body portion. The wheel cover assembly also includes at least one retention clip operably coupled with the cover member and having leg portion and an engagement portion extending outwardly from the leg portion, wherein the leg portion abuts the inner surface of the skirt portion along a length of the leg portion, and wherein the engagement portion is adapted to abut a lug nut of a wheel assembly, thereby releasably coupling the wheel cover assembly with the wheel assembly.
